Participant Rubric

Your work is scored out of 100 on what works in the running application, tested by the judges.

#	Criterion	Points	Full marks when
1	Roles, permissions and security	10	Roles and permissions can be changed in the interface; hidden data stays hidden through the API; one workspace cannot see another
2	Customizable CRM	12	Custom fields, per-pipeline fields, required fields by stage, editable pipeline and saved lists all work
3	Lead assignment and escalation	14	Leads go only to available staff; the countdown is visible; an expired lead escalates once; absence reassigns at once; the recovery queue shows why
4	Audit log and dashboard	8	Key actions are logged and cannot be edited; dashboard figures are live, match the records and differ by role
5	Messaging integration	12	A real phone message arrives, a reply is delivered, forged or repeated webhooks are handled, failures are visible and retryable
6	Payments integration	12	A real test payment updates the record automatically; webhooks are verified and not double-counted; refunds and failures show
7	Calendar integration	10	Google sign-in works, appointments appear in the real calendar, clashes are detected, time zones are correct
8	Notification integration	4	An escalated lead sends a real alert with a working link
9	Quality	10	Works on a phone, shows clear errors, no secrets in code, data survives a restart, one failing provider does not break the rest
10	Demo and understanding	8	The live demo runs, the checklist is honest, and every member can explain their code
	Total	**100**	

Score levels. Judges give each criterion one of four levels.

Level	Share of points	Meaning
Full	100%	Works end to end, handles bad input, data is still there after a refresh
Mostly	60%	Normal path works; one clear gap
Partial	30%	Visible but incomplete, or only works with prepared data
None	0%	Missing, or claimed but not working

Ground rules

- **Judges test it live.** Only what works in the running application counts.
- **Integrations must be real.** A fake or hard-coded provider earns at most Partial on criteria 5 to 8. Sandbox or test mode of the real service is fine.
- **Be honest.** Ticking items on your self-check list that fail when tested lowers your score on criterion 10.
